3. Product Description

IPCO Flashing mastic is an asphalt/rubber based mastic which provides excellent adhesion to the IPCO Flashing membrane, structural concrete, masonry, and wood surfaces.

IPCO Flashing Mastic is an integral part of the IPCO Flashing System and substitutions are not allowed.

IPCO Flashing Mastic is designed to protect the termination edges, overlaps, patches, and any additional detailing areas. On vertical applications, IPCO Flashing Mastic must be applied both on the bottom and top terminations of IPCO Flashing membrane. IPCO Flashing mastic should not be applied in any area where it will be covered by IPCO Flashing membrane.

4. Technical Data

Physical Properties

Color: Black
Specific Gravity: 1.12
Flash Point 105°F (41°C)
(PM closed cup)

5. Installation

IPCO Flashing Mastic is supplied in either a 5 gallon pail or in a 30 oz. caulking tube. If material is applied with a caulking gun, the bead must be struck with a trowel to ensure the mastic is worked into the termination edges. If the material is supplied in a pail, it may be applied either with a trowel or by hand using rubber gloves as a precaution. When applied as a temporary cut-off, trowel the IPCO Flashing Mastic over the membrane with a very thin layer and allow to cure a minimum of 12 hours before placement of additional IPCO Flashing membrane.

On the Bottom edge of any vertical application, IPCO Flashing Mastic must be applied liberally to these areas. IPCO Flashing Mastic should also be applied around any protrusions, drains, or any area requiring patching or specific detailing.

All IPCO Products must be handled in a safe manner. Some products (some mastics or primers) may contain solvents, and these deserve special attention to safety since their vapors are both flammable and harmful if inhaled. Read the product label and material safety data sheet prior to use.

6. Availability and Cost

All Illinois Products Corporation products and prices are available through a nationwide network of masonry and building supply distributors.

7. Warranty

The information in this data sheet is designed to be helpful to the reader. It is based on experience and information considered to be, accurate and true. Readers should carefully consider and verify the information with investigation of any areas of uncertainty. Illinois Products Corporation does not warrant the results to be obtained. Additionally, please read everything here in conjunction with all literature for products supplied by IPCO. No statement here is intended for any use which would infringe any patent or copyright. IPCO will replace (FOB South Elgin) any unused material proven to be defective. No expressed or implied warranty of installed material is made because satisfactory results depend not only on product quality, but also upon factors beyond IPCO's control.

8. Maintenance

No maintenance is required after proper installation.

9. Technical Services

Contact the manufacturer for any required technical services. Details and suggested application drawings are available on each individual product data sheet. IPCO Material Safety Data Sheets should be read and understood by all personnel before using the products.

10. Filing Systems

Product information is available from the manufacturer in the following formats:

- Complete IPCO product line catalog in printed or CD formats
- Online access to all data sheets at: www.illinoisproducts.com
